Hardware and Sensors

Rolling Dice

1. Create a project, which will count down from 9 to 0 using a seven segment led. Using the following components:
 - a. Seven segment led
 - b. Arduino Uno
2. Using the push-button try to auto generate a new number (between 1 and 6) each time the key was pressed.
3. Submit your code and circuit(s) screenshot(s) into the eLearning Hardware and Sensor dropbox.
